002	Minor updates.	August 17, 2015

§

# 1 Introduction

---

## 1.1 Scope

This specification defines the interface to the PSME module to support the discovery, compositability, and manageability of Intel® Rack Scale Architecture drawers.

The PSME API and schema has been built on top of the Redfish/SPMF API and schema version 0.94. Refer to <http://www.redfishspecification.org/> for details of Redfish.

Processor resource has been added to PSME API from Redfish Specification 0.96 version.

## 1.2 Intended audience

The intended audiences for this document include:

- Software vendors (ISVs) of pod management software, who make use of the PSME API to discover, compose and manager drawers, regardless of the hardware vendor and/or manage drawers in a multivendor environment.
- Software Vendors (OxMs) of PSME firmware that will implement of PSME firmware for their hardware platforms, providing Intel® Rack Scale Architecture compliant systems.

## 1.3 Terminology

**Table 1 Terminology**

Term	Definition
BMC	Baseboard management controller
CIMI	Cloud Infrastructure Management Interface
HTTP	Hypertext Transfer Protocol
JSON	JavaScript object notation
NIC	Network interface card
OCCI	Open Cloud Computing Interface
OData	Open Data Protocol
OVF	Open virtualization format
POD	A physical collection of multiple racks
PODM	POD Manager
PSME	Pooled System Management Engine
REST	Representational state transfer
SDV	Software development vehicle
URI	Uniform resource identifier
UUID	Universally unique identifier
XML	Extensible Markup Language

## 2 PSME API

## 2.1 PSME API structure and relations

The PSME REST API provides the REST-based interface that allows full management of the PSME, including asset discovery and configuration.

## 2.1.1 PSME API physical resource hierarchy

## Figure 1 PSME REST API hierarchy

**Table 3 Resources and URIs**

Resource	URI
Service Root	/rest/v1
Drawer Collection	/rest/v1/Drawers
Drawer	/rest/v1/Drawers/{drawerID}
Compute Module Collection	/rest/v1/Drawers/{drawerID}/ComputeModules
Compute Module	/rest/v1/Drawers/{drawerID}/ComputeModules/{moduleID}
Blade Collection	/rest/v1/Drawers/{drawerID}/ComputeModules/{moduleID}/Blades
Blade	/rest/v1/Drawers/{drawerID}/ComputeModules/{moduleID}/Blades/{bladeID}
Processors Collection	/rest/v1/Drawers/{drawerID}/ComputeModules/{moduleID}/Blades/{bladeID}/Processors
Processor	/rest/v1/Drawers/{drawerID}/ComputeModules/{moduleID}/Blades/{bladeID}/Processors/{processorID}
Memory Collection	/rest/v1/Drawers/{drawerID}/ComputeModules/{moduleID}/Blades/{bladeID}/Memory
Memory	/rest/v1/Drawers/{drawerID}/ComputeModules/{moduleID}/Blades/{bladeID}/Memory/{memoryID}
Storage Controllers Collection	/rest/v1/Drawers/{drawerID}/ComputeModules/{moduleID}/Blades/{bladeID}/StorageControllers
Storage Controller	/rest/v1/Drawers/{drawerID}/ComputeModules/{moduleID}/Blades/{bladeID}/StorageControllers/{controllerID}
Drives Collection	/rest/v1/Drawers/{drawerID}/ComputeModules/{moduleID}/Blades/{bladeID}/StorageControllers/{controllerID}/Drives
Drive	/rest/v1/Drawers/{drawerID}/ComputeModules/{moduleID}/Blades/{bladeID}/StorageControllers/{controllerID}/Drives/{driveID}
Manager Collection	/rest/v1/Managers
Manager	/rest/v1/Managers/{managerID}
Network Service	/rest/v1/Managers/{managerID}/NetworkService
Network Interface Collection	/rest/v1/Drawers/{drawerID}/ComputeModules/{moduleID}/Blades/{bladeID}/EthernetInterfaces /rest/v1/Managers/{managerID}/EthernetInterfaces
Network Interface	/rest/v1/Drawers/{drawerID}/ComputeModules/{moduleID}/Blades/{bladeID}/EthernetInterfaces/{nicID} /rest/v1/Managers/{managerID}/EthernetInterfaces/{nicID}
Fabric Module Collection	/rest/v1/Drawers/{drawerID}/FabricModules
Fabric Module	/rest/v1/Drawers/{drawerID}/FabricModules/{moduleID}
Fabric Switch Collection	/rest/v1/Drawers/{drawerID}/FabricModules/{moduleID}/Switches
Fabric Switch	/rest/v1/Drawers/{drawerID}/FabricModules/{moduleID}/Switches/{switchID}
Fabric Switch Port Collection	/rest/v1/Drawers/{drawerID}/FabricModules/{moduleID}/Switches/{switchID}/Ports

VLAN Network Interface Collection	/rest/v1/Drawers/{drawerID}/FabricModules/{moduleID}/Switches/{switchID}/Ports/{portID}/VLANs /rest/v1/Drawers/{drawerID}/ComputeModules/{moduleID}/Blades/{bladeID}/EthernetInterfaces/{nicID}/VLANs
VLAN Network Interface	/rest/v1/Drawers/{drawerID}/FabricModules/{moduleID}/Switches/{switchID}/Ports/{portID}/VLANs/{vlanID} /rest/v1/Drawers/{drawerID}/ComputeModules/{moduleID}/Blades/{bladeID}/EthernetInterfaces/{nicID}/VLANs/{vlanID}

§

## 3 PSME REST API Error Codes

This chapter contains descriptions of all error codes that may be returned by the REST calls implemented in the PSME REST API of the Intel® Rack Scale Architecture software v1.1 release.

### 3.1 API error response

In the case of an error, the PSME REST API responds with an HTTP status code, as defined by the HTTP 1.1 specification and constrained by additional requirements defined in this specification.

HTTP response status codes alone often do not provide enough information to enable deterministic error semantics. PSME REST API return extended error information as a JSON object with single property named "error". The value of this property shall be a JSON object with the properties shown in Table 4.

**Table 4 API error response attributes**

Attribute	Description
code	String indicating a specific error or message (not to be confused with the HTTP status code).
message	A human readable error message indicating the semantics associated with the error.
target	An optional string defining the target of the particular error.
details	An optional array of JSON objects with code, message, target, severity, and resolution properties, providing more detailed information about the error.
message.parameters	An optional array of strings representing the substitution parameter values for the message. The Severity attribute is an annotation specified in the DMTF namespace and shall be prefixed with the alias "message".
message.severity	An optional string representing the severity of the error. The Severity attribute is an annotation specified in the DMTF namespace and shall be prefixed with the alias "message".
message.resolution	An optional string describing recommended action(s) to take to resolve the error. The Resolution attribute is an annotation specified in the DMTF namespace and shall be prefixed with the alias "message".

#### 3.1.1 Example error JSON object

```
{  
    "error": {  
        "code": "Base.1.0.InvalidEndpoint",  
        "message": "Invalid endpoint in /rest/v1 namespace",  
        "details": [  
            {  
            }  
        ]  
    }  
}
```

## 3.2 API error codes

In general, if an error is not described in any of the following tables, it is to be mapped into HTTP 500 Internal Error code.

### 3.2.1 General error codes

**Table 5 General error codes**

Error code	Description	HTTP status code
UnknownException	A generic error message, given when an unexpected condition was encountered and no more specific message is suitable.	500 Internal Error

### 3.2.2 Request error codes

**Table 6 Request error codes**

Error code	Description	HTTP status code
InvalidEndpoint	Invalid endpoint in /rest/v1 namespace	404 Not Found
InvalidPayload	Request payload is invalid or missing	400 Bad Request
MalformedUri	Malformed URI	400 Bad Request

§

## 4 PSME REST API Definition

### 4.1 Service root

Service root resource – entry point.

**Table 7 Service root attributes**

Name	Service root		
Type URI	/rest/v1/		
Attribute	Type	Required	Description
Id	String	Yes	Resource identifier
Name	String	Yes	Name of service root
Modified	String	Yes	The date-time stamp that the object was last modified
Time	String	No	The current time as reported by the owner of this SPMA Service
ServiceVersion	String	Yes	Version of Redfish service in majorversion.minorversion.errata format.
UUID	String	Yes	Unique identifier for a service instance – must be constant for particular drawer.
Chassis	Link	Yes	Link to chassis collection (Drawers)
Systems	Link	No	Link to Computer Systems collection (logical server nodes)
Services	Link	No	Link to services collection
Managers	Link	Yes	Link to Managers collection

**Note:** Link sections Systems and Services are empty for PSME.

#### 4.1.1 Metadata

TBD.

#### 4.1.2 JSON serialization

```
{  
    "@odata.context": string,  
    "@odata.id": string,  
    "@odata.type": string,  
    "Id": string,  
    "Name": string,  
    "Modified": string,  
    "Time": string,  
    "ServiceVersion": string,  
    "UUID": string,  
    "Links": {  
        "Chassis": {  
            "@odata.id": string  
        },  
        "Systems": {  
            "@odata.id": string  
        },  
        "Services": {  
            "@odata.id": string  
        },  
        "Managers": {  
            "@odata.id": string  
        }  
    }  
}
```

```
        },
}
```

### 4.1.3 Operations

#### 4.1.3.1 GET

Request:

```
GET /rest/v1
Content-Type: application/json
```

Response:

```
{
    "@odata.context": "/rest/v1/$metadata#ServiceRoot",
    "@odata.id": "/rest/v1",
    "@odata.type": "#RSAServiceRoot.1.0.0.RSAServiceRoot",
    "Id": "RootService",
    "Name": "RSA Service Root",
    "Modified": "2015-02-20T14:44:01+00:00",
    "Time": "2015-03-04T13:45:04+00:00",
    "ServiceVersion": "1.0.0",
    "UUID": "00000000-0000-0000-0000-000000000000",
    "Links": {
        "Chassis": {
            "@odata.id": "/rest/v1/Drawers"
        },
        "Managers": {
            "@odata.id": "/rest/v1/Managers"
        }
    }
}
```

#### 4.1.3.2 PUT

Operation is not allowed on this resource.

#### 4.1.3.3 PATCH

Operation is not allowed on this resource.

#### 4.1.3.4 POST

Operation is not allowed on this resource.

#### 4.1.3.5 DELETE

Operation is not allowed on this resource.

## 4.2 Drawers collection

Drawers collection resource – provides collection of all drawers available.

**Table 8 Drawers collection attributes**

Name	Drawers		
Type URI	/rest/v1/Drawers		
Attribute	Type	Required	Description
Name	String	Yes	Name of collection
Modified	String	Yes	The date-time stamp that the object was last modified

## 4.2.1 Metadata

TBD.

## 4.2.2 JSON serialization

```
{  
    "@odata.context": string,  
    "@odata.id": string,  
    "@odata.type": string,  
    "Name": string,  
    "Modified": string,  
    "Links": {  
        "Members@odata.count": Number,  
        "Members": [  
            {  
                "@odata.id": string  
            }  
        ]  
    }  
}
```

## 4.2.3 Operations

### 4.2.3.1 GET

Request:

```
GET /rest/v1/Drawers  
Content-Type: application/json
```

Response:

```
{  
    "@odata.context": "/rest/v1/$metadata#RSADrawers",  
    "@odata.id": "/rest/v1/Drawers",  
    "@odata.type": "#RSADrawer.1.0.0.RSADrawersCollection",  
    "Name": "Drawers Collection",  
    "Modified": "2015-02-23T14:44:01+00:00",  
    "Links": {  
        "Members@odata.count": 1,  
        "Members": [  
            {  
                "@odata.id": "/rest/v1/Drawers/1"  
            }  
        ]  
    }  
}
```

#### 4.2.3.2 PUT

Operation is not allowed on this resource.

#### 4.2.3.3 PATCH

Operation is not allowed on this resource.

#### 4.2.3.4 POST

Operation is not allowed on this resource.

#### 4.2.3.5 DELETE

Operation is not allowed on this resource.

### 4.3 Drawer

Drawer (aka. tray) resource – provides detailed information about a single drawer.

**Table 9** **Drawer attributes**

Name	Drawer																		
Type URI	/rest/v1/Drawers/{DrawerId}																		
Attribute	Type	Required	Description																
Id	String	Yes	Resource identifier																
Name	String	Yes	Name of the drawer																
Modified	String	Yes	The date-time stamp that the object was last modified																
ChassisType	String	Yes	Physical form factor of this resource																
Manufacturer	String	No	Manufacturer name																
Model	String	No	Drawer model																
SerialNumber	String	No	Drawer serial number																
Status	Object	Yes	Resource status represented by following object: <table border="1"> <thead> <tr> <th>Name</th><th>Type</th><th>Required</th><th>Description</th></tr> </thead> <tbody> <tr> <td>State</td><td>String</td><td>Yes</td><td>Known state of the resource</td></tr> <tr> <td>Health</td><td>String</td><td>No</td><td>Overall health state from the view of this resource</td></tr> <tr> <td>HealthRollup</td><td>String</td><td>No</td><td>Health state of this resource in the absence of its dependent resources</td></tr> </tbody> </table>	Name	Type	Required	Description	State	String	Yes	Known state of the resource	Health	String	No	Overall health state from the view of this resource	HealthRollup	String	No	Health state of this resource in the absence of its dependent resources
Name	Type	Required	Description																
State	String	Yes	Known state of the resource																
Health	String	No	Overall health state from the view of this resource																
HealthRollup	String	No	Health state of this resource in the absence of its dependent resources																
EnumStatus	String	Yes	Status of resource enumeration																
Location	Object	Yes	<table border="1"> <thead> <tr> <th>Name</th><th>Type</th><th>Required</th><th>Description</th></tr> </thead> <tbody> <tr> <td>Pod</td><td>Number</td><td>Yes</td><td>Pod number</td></tr> <tr> <td>Rack</td><td>Number</td><td>Yes</td><td>Rack number</td></tr> <tr> <td>Drawer</td><td>Number</td><td>Yes</td><td>Drawer number</td></tr> </tbody> </table>	Name	Type	Required	Description	Pod	Number	Yes	Pod number	Rack	Number	Yes	Rack number	Drawer	Number	Yes	Drawer number
Name	Type	Required	Description																
Pod	Number	Yes	Pod number																
Rack	Number	Yes	Rack number																
Drawer	Number	Yes	Drawer number																
Oem	Object	No	OEM defined object																
ComputeModules	Link	Yes	Link to Compute Modules collection																
FabricModules	Link	Yes	Link to Fabric Modules collection																
ManagedBy	Array	Yes	Array of links to Managers of that Drawer																

#### 4.3.1 Metadata

TBD.

#### 4.3.2 JSON serialization

```
{  
    "@odata.context": string,  
    "@odata.id": string,  
    "@odata.type": string,  
    "Id": string,  
    "Name": string,  
    "Modified": string,

            }
        ],
        "Oem": {}
    }
}
```

#### 4.3.3.2 PUT

Operation is not allowed on this resource.

### 4.3.3.3 PATCH

Operation is not allowed on this resource.

### 4.3.3.4 POST

Operation is not allowed on this resource.

### 4.3.3.5 DELETE

Operation is not allowed on this resource.

## 4.4 Compute module collection

Compute module collection resource – provides collection of all compute modules available in a drawer.

**Table 10 Modules collection attributes**

<b>Name</b>	Compute modules		
<b>Type URI</b>	/rest/v1/Drawers/1/ComputeModules		
Attribute	Type	Required	Description
Name	String	Yes	Name of collection
Modified	String	Yes	The date-time stamp that the object was last modified

### 4.4.1 Metadata

TBD

### 4.4.2 JSON serialization

```
{  
    "@odata.context": string,  
    "@odata.id": string,  
    "@odata.type": string,  
    "Name": string,  
    "Modified": string,  
    "Links": {  
        "Members@odata.count": Number,  
        "Members": [  
            {  
                "@odata.id": string  
            }  
        ]  
    }  
}
```

### 4.4.3 Operations

#### 4.4.3.1 GET

Request:

```
GET /rest/v1/Drawers/1/ComputeModules  
Content-Type: application/json
```

Response:

```
{
    "@odata.context": "/rest/v1/$metadata#RSADrawers/Links/Members/1/ComputeModules",
    "@odata.id": "/rest/v1/Drawers/1/ComputeModules",
    "@odata.type": "#RSAComputeModule.1.0.0.RSAComputeModuleCollection",
    "Name": "Compute Module Collection",
    "Modified": "2015-02-23T14:44:00+00:00",
    "Links": {

            {
                "@odata.id":
                "/rest/v1/Drawers/1/ComputeModules/3"
            }
        ]
    }
}
```

#### 4.4.3.2 PUT

Operation is not allowed on this resource.

#### 4.4.3.3 PATCH

Operation is not allowed on this resource.

#### 4.4.3.4 POST

Operation is not allowed on this resource.

#### 4.4.3.5 DELETE

Operation is not allowed on this resource.

### 4.5 Compute module

Compute module resource – provides detailed information about a single module identified by {moduleID}.

**Table 11 Module attributes**

<b>Name</b>	Compute module		
<b>Type URI</b>	/rest/v1/Drawers/1/ComputeModules/{moduleID}		
Attribute	Type	Required	Description
<b>Id</b>	String	Yes	Resource identifier
<b>Name</b>	String	Yes	Name of module
<b>Modified</b>	String	Yes	The date-time stamp that the object was last modified
<b>ChassisType</b>	String (enum)	Yes	Physical form factor of this resource

<b>Name</b>	Compute module					
<b>Type URI</b>	/rest/v1/Drawers/1/ComputeModules/{moduleID}					
<b>Attribute</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>			
Manufacturer	String	No	Manufacturer name			
Model	String	No	Compute module model			
SerialNumber	String	No	Module serial number			
Status	Object	Yes	Resource status represented by following object:			
			<b>Name</b>	<b>Type</b>		
			State	String		
			Health	String		
			HealthRollup	String		
			Known state of the resource			
			Overall health state from the view of this resource			
			Health state of this resource in the absence of its dependent resources			
EnumStatus	String	Yes	Status of resource enumeration			
Location	Object	Yes	<b>Name</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>
			Pod	Number	Yes	Pod number
			Rack	Number	Yes	Rack number
			Drawer	Number	Yes	Drawer number
			Module	Number	Yes	Module number
Oem	Object	No	OEM defined object			
Blades	Link	Yes	Link to Blades collection			
ContainedBy	Link	Yes	Link to entity containing this module			
ManagedBy	Array	Yes	Array of links to manager of this module			

## 4.5.1 Metadata

## 4.5.2 JSON serialization

```
{  
    "@odata.context": string,  
    "@odata.id": string,  
    "@odata.type": string,  
    "Id": string,

            }
        ]
    }
}
```

#### 4.6.3.2 PUT

Operation is not allowed on this resource.

#### 4.6.3.3 PATCH

Operation is not allowed on this resource.

#### 4.6.3.4 POST

Operation is not allowed on this resource.

#### 4.6.3.5 DELETE

Operation is not allowed on this resource.

## 4.7 Blade

Blade resource – provides detailed information about a blade identified by {bladeID}.

**Table 13 Blade attributes**

Name	Blade			
Type URI	/rest/v1/Drawers/1/ComputeModules/1/Blades/{bladeID}			
Attribute	Type	Required	Description	
Id	String	Yes	Resource identifier	
Name	String	Yes	Name of module	
Modified	String	Yes	The date-time stamp when the object was last modified	
SystemType	String (enum)	Yes	Type of computer system (physical, virtual)	
Manufacturer	String	No	Manufacturer name	
Model	String	No	Computer system model	
SerialNumber	String	No	Module serial number	
Power	String (enum). null	No	System power state	
Bios	Object	No	BIOS version	
StorageCapable	Boolean	Yes	Storage controller available on blade.	
StorageControllersCount	Number	No	Number of storage controllers present.	
Processors	Object	Yes	<b>Name</b> <b>Type</b> <b>Required</b> <b>Description</b> Count      Number      Yes      Number of CPUs ProcessorSockets      Number      No      Number of available CPU sockets ProcessorFamily      String      No      Basic information about processor type Status      Object      Yes      See Status property below	
Memory	Object	Yes		
Status	Object	Yes	Resource status represented by following object:	
			<b>Name</b> <b>Type</b> <b>Required</b> <b>Description</b> State      String      Yes      Known state of the resource Health      String      No      Overall health state from the view of this resource HealthRollup      String      No      Health state of this resource in the absence of its dependent resources	
EnumStatus	String	Yes		
Location	Object	Yes		
			<b>Name</b> <b>Type</b> <b>Required</b> <b>Description</b> Pod      Number      Yes      Pod number Rack      Number      Yes      Rack number Drawer      Number      Yes      Drawer number Module      Number      Yes      Module number Blade      Number      Yes      Blade number	

<b>Name</b>	Blade					
<b>Type URI</b>	/rest/v1/Drawers/1/ComputeModules/1/Blades/{bladeID}					
<b>Attribute</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>			
Boot	Object, Null	No	<b>Name</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>
			BootSourceOverrideEnabled	String, Null	No	State of the Boot Source Override feature. Proper values: "Disabled" "Once" "Continuous"
			BootSourceOverrideTarget	String, Null	No	The current boot source to be used at next boot instead of the normal boot device, if BootSourceOverrideEnabled is true. Can be set to value listed in BootSourceOverrideSupported property.
			BootSourceOverrideSupported	Array	No	Array of sources from which this system can be booted, overriding the normal boot order. Available values listed in appendix <b>Error! Reference source not found.</b>
Oem	Object	No	OEM defined object			
			Link to Processors collection			
			Link to Memory collection			
			An array of references to the chassis in which this blade is contained			
			Link to Storage Controllers collection			
			Link to Ethernet Interface collection associated with this system			
			An array of links to Managers responsible for this blade			
			Actions available for this blade.			
<ul style="list-style-type: none"> <li>• Reset action with following values:           <ul style="list-style-type: none"> <li>◦ On - Turn the system on</li> <li>◦ ForceOff - Turn the system off immediately (non-graceful) shutdown</li> <li>◦ GracefulRestart - Perform a graceful system shutdown followed by a restart of the system</li> <li>◦ ForceRestart - Perform an immediate (non-graceful) shutdown, followed by a restart of the system</li> <li>◦ Nmi - Generate a Diagnostic Interrupt (usually an NMI on x86 systems) to cease normal operations, perform diagnostic actions and typically halt the system.</li> <li>◦ ForceOn - Turn the system on immediately</li> <li>◦ PushPowerButton - Simulate the pressing of the physical power button on this system</li> <li>◦ SoftShutdown – initiate a soft-shutdown of OS via ACPI</li> </ul> </li> </ul>						

## 4.7.1 Metadata

TBD

#### 4.7.3.2 PUT

Operation is not allowed on this resource.

#### 4.7.3.3 PATCH

Request:

```
PATCH /rest/v1/Drawers/1/ComputeModules/1/Blades/1
Content-Type: application/json
{
    "Boot": {
        "BootSourceOverrideEnabled": "Once",
        "BootSourceOverrideTarget": "Pxe"
    }
}
```

Response:

```
HTTP/1.1 200 OK
```

#### 4.7.3.4 POST

Request:

```
POST /rest/v1/Drawers/1/ComputeModules/1/Blades/1/Actions/RSABlade.Reset
Content-Type: application/json
{
    "ResetType": "On"
}
```

Response:

```
HTTP/1.1 200 OK
```

#### 4.7.3.5 DELETE

Operation is not allowed on this resource.

### 4.8 Processor collection

Processor collection resource – provides collection of all processors available in a blade.

**Table 14 Processor collection attributes**

<b>Name</b>	Processors		
<b>Type URI</b>	/rest/v1/Drawers/1/ComputeModules/1/Blades/{bladeID}/Processors		
Attribute	Type	Required	Description
Name	String	Yes	Name of collection
Modified	String	Yes	The date-time stamp that the object was last modified

#### 4.8.1 Metadata

TBD.

#### 4.8.2 JSON serialization

```
{
    "@odata.context": string,
    "@odata.id": string,
    "@odata.type": string,
    "Name": string,
    "Modified": string,
    "Links": {
        "Members@odata.count": Number,
        "Members": [
            {
                "@odata.id": string
            }
        ]
    }
}
```

#### 4.8.3 Operations

##### 4.8.3.1 GET

Request:

```
GET /rest/v1/Drawers/1/ComputeModules/1/Blades/{bladeID}/Processors
Content-Type: application/json
```

Response:

```
{
    "@odata.context": "/rest/v1/$metadata#RSAProcessors",
    "@odata.id":
"/rest/v1/Drawers/1/ComputeModules/1/Blades/1/Processors",
    "@odata.type": "#RSAProcessor.1.0.0.RSAProcessorCollection",

            {
                "@odata.id": "/rest/v1/Drawers/1/ComputeModules/1/Blades/1/Processors/1"
            },
            {
                "@odata.id": "/rest/v1/Drawers/1/ComputeModules/1/Blades/1/Processors/2"
            }
        ]
    }
```

#### 4.8.3.2 PUT

Operation is not allowed on this resource.

#### 4.8.3.3 PATCH

Operation is not allowed on this resource.

#### 4.8.3.4 POST

Operation is not allowed on this resource.

#### 4.8.3.5 DELETE

Operation is not allowed on this resource.

## 4.9 Processor

Processor resource – provides detailed information about a single processor identified by {ProcessorID}.

**Table 15 Processor attributes**

<b>Name</b>	Processor						
<b>Type URI</b>	/rest/v1/Drawers/1/ComputeModules/1/Blades/{bladeID}/Processors/{ProcessorID}						
Attribute	Type	Required	<b>Description</b>				
<code>Id</code>	String	Yes	Resource identifier				
<code>Name</code>	String	Yes	Name of module				
<code>Modified</code>	String	Yes	The date-time stamp that the object was last modified				
<code>Socket</code>	String	No	Socket identifier where processor is installed				
<code>Manufacturer</code>	String	No	Manufacturer name				
<code>Model</code>	String (enum), null	Yes	Processor model (based on CPUID) Xeon family: E3, E5, E7 SoC/Atom family: X3 (Avoton), X5 (Broadwell-DE), X7 Core family: I3, I5, I7 "Unknown" – discovered processor is unknown				
<code>ProcessorType</code>	String	Yes	Module serial number				
<code>ProcessorArchitecture</code>	String	No	CPU architecture				
<code>InstructionSet</code>	String (enum), null	No	Supported CPU instruction set				
<code>InstructionSetExtensions</code>	Array	No	Array of CPU instruction set extensions such as: <ul style="list-style-type: none"><li>• X86:SSE</li><li>• X86:SSE2</li><li>• X86:SSE3</li><li>• X86:SSE4</li><li>• X86:SSE5</li><li>• X86:AVX</li><li>• X86:AVX2</li><li>• X86:VT-d</li><li>• X86:VT-x</li><li>• X86:AES</li><li>• X86:MMX</li><li>• X86:EM64T</li></ul>				
<code>ProcessorId</code>	Object	No	<b>Name</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>	
			<code>VendorId</code>	String	No	Numeric vendor id	
			<code>NumericId</code>	Number	No	cpuid.1.eax[31:0]	
			<code>Family</code>	Number	No	CPU family	
			<code>Model</code>	Number	No	CPU model	
			<code>Step</code>	Number	No	CPU stepping	
			<code>MicrocodeInfo</code>	Number (64bit)	No	Microcode version	
<code>MaxSpeedMHz</code>	Number	No	Maximum supported frequency of CPU				
<code>TotalCores</code>	Number	No	Number of available cores				
<code>EnabledCores</code>	Number	No	Number of enabled cores				
<code>TotalThreads</code>	Number	No	Number of available threads				
<code>EnabledThreads</code>	Number	No	Number of enabled threads				
<code>Status</code>	Object	Yes	Resource status represented by following object:				
			<b>Name</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>	

<b>Name</b>	Processor				
<b>Type URI</b>	/rest/v1/Drawers/1/ComputeModules/1/Blades/{bladeID}/Processors/{ProcessorID}				
<b>Attribute</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>		
			State	String	
			Health	String	
			HealthRollup	String	
Location	Object	Yes	<b>Name</b>	<b>Type</b>	
			Pod	Number	
			Rack	Number	
			Drawer	Number	
			Module	Number	
			Blade	Number	
Oem	Object	No	OEM defined object		
ContainedBy	Link	Yes	Link to a blade containing this processor		

#### 4.9.1 Metadata

TBD

#### 4.9.2 JSON serialization

#### 4.10.3.5 DELETE

Operation is not allowed on this resource.

### 4.11 Memory

Memory resource – provides detailed information about a single memory module identified by {memoryID}.

**Table 17 Memory attributes**

Name	Memory		
Type URI	/rest/v1/Drawers/1/ComputeModules/1/Blades/{bladeID}/Memory/{memoryID}		
Attribute	Type	Required	Description
Id	String	Yes	Resource identifier
Name	String	Yes	Name of module
Modified	String	Yes	The date-time stamp that the object was last modified
Manufacturer	String	No	Manufacturer name
Socket	String	Yes	String that identifies the physically-labeled socket or board position where the memory device is located
Bank	String	No	String that identifies the physically labeled bank where the memory device is located
Type	String (enum), null	No	Type of memory
SizeGB	Number	Yes	Size of memory in GB
SpeedMHz	Number	No	Maximum memory module supported speed
VoltageVolt	Number	No	Typical memory voltage
DataWidthBits	Number	No	Data width, in bits, of this memory device A Data Width of 0 and a Total Width of 8 indicates that the device is being used solely to provide 8 error-correction bits
TotalWidthBits	Number	No	Total width, in bits, of this memory device, including any check or error-correction bits If there are no error-correction bits, this value should be equal to Data Width.
FormFactor	Enum	No	Implementation form factor for this memory device
SerialNumber	String	No	String number for the serial number of this memory device
AssetTag	String	No	String number for the asset tag of this memory device

<b>Name</b>	Memory																										
<b>Type URI</b>	/rest/v1/Drawers/1/ComputeModules/1/Blades/{bladeID}/Memory/{memoryID}																										
<b>Attribute</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>																								
PartNumber	String	No	String number for the part number of this memory device																								
Rank	String	No	Memory rank																								
ConfiguredSpeedMHz	Number	No	Identifies the configured clock speed to the memory device, in megahertz (MHz)																								
MinimumVoltageVolt	Number	No	Minimum operating voltage for this device, in volts																								
MaximumVoltageVolt	Number	No	Maximum operating voltage for this device, in volts																								
Status	Object	Yes	Resource status represented by following object: <table border="1"> <thead> <tr> <th>Name</th><th>Type</th><th>Required</th><th>Description</th></tr> </thead> <tbody> <tr> <td>State</td><td>String</td><td>Yes</td><td>Known state of the resource</td></tr> <tr> <td>Health</td><td>String</td><td>No</td><td>Overall health state from the view of this resource</td></tr> <tr> <td>HealthRollup</td><td>String</td><td>No</td><td>Health state of this resource in the absence of its dependent resources</td></tr> </tbody> </table>	Name	Type	Required	Description	State	String	Yes	Known state of the resource	Health	String	No	Overall health state from the view of this resource	HealthRollup	String	No	Health state of this resource in the absence of its dependent resources								
Name	Type	Required	Description																								
State	String	Yes	Known state of the resource																								
Health	String	No	Overall health state from the view of this resource																								
HealthRollup	String	No	Health state of this resource in the absence of its dependent resources																								
Location	Object	Yes	<table border="1"> <thead> <tr> <th>Name</th><th>Type</th><th>Required</th><th>Description</th></tr> </thead> <tbody> <tr> <td>Pod</td><td>Number</td><td>Yes</td><td>Pod number</td></tr> <tr> <td>Rack</td><td>Number</td><td>Yes</td><td>Rack number</td></tr> <tr> <td>Drawer</td><td>Number</td><td>Yes</td><td>Drawer number</td></tr> <tr> <td>Module</td><td>Number</td><td>Yes</td><td>Module number</td></tr> <tr> <td>Blade</td><td>Number</td><td>Yes</td><td>Blade number</td></tr> </tbody> </table>	Name	Type	Required	Description	Pod	Number	Yes	Pod number	Rack	Number	Yes	Rack number	Drawer	Number	Yes	Drawer number	Module	Number	Yes	Module number	Blade	Number	Yes	Blade number
Name	Type	Required	Description																								
Pod	Number	Yes	Pod number																								
Rack	Number	Yes	Rack number																								
Drawer	Number	Yes	Drawer number																								
Module	Number	Yes	Module number																								
Blade	Number	Yes	Blade number																								
Oem	Object	No	OEM defined object																								
ContainedBy	Link	Yes	Link to a blade containing this memory																								

#### 4.11.1 Metadata

TBD

#### 4.11.2 JSON serialization

Operation is not allowed on this resource.

## 4.12 Storage controller collection

Storage controllers collection resource – provides collection of all storage controllers available in a blade.

**Table 18 Storage controllers collection attributes**

<b>Name</b>	Storage controllers		
<b>Type URI</b>	/rest/v1/Drawers/1/ComputeModules/1/Blades/{bladeID}/StorageControllers		
Attribute	Type	Required	Description
Name	String	Yes	Name of collection
Modified	String	Yes	The date-time stamp that the object was last modified

### 4.12.1 Metadata

TBD.

### 4.12.2 JSON serialization

```
{  
    "@odata.context": "string,  
    "@odata.id": "string,  
    "@odata.type": "string,  
    "Name": "string,  
    "Modified": "string,  
    "Links": {  
        "Members@odata.count": Number,  
        "Members": [  
            {  
                "@odata.id": string  
            }  
        ]  
    }  
}
```

### 4.12.3 Operations

#### 4.12.3.1 GET

Request:

```
GET /rest/v1/Drawers/1/ComputeModules/1/Blades/{bladeID}/StorageControllers  
Content-Type: application/json
```

Response:

```
{  
    "@odata.context": "/rest/v1/$metadata#RSASStorageControllers ",  
    "@odata.id": "/rest/v1/Drawers/1/ComputeModules/1/Blades/1/StorageControllers ",  
    "@odata.type": "#RSASStorageController.1.0.0.RSASStorageControllersCollection",

}  

}

```

#### 4.12.3.2 PUT

Operation is not allowed on this resource.

#### 4.12.3.3 PATCH

Operation is not allowed on this resource.

#### 4.12.3.4 POST

Operation is not allowed on this resource.

#### 4.12.3.5 DELETE

Operation is not allowed on this resource.

### 4.13 Storage controller

Storage Controller resource – provides detailed information about a single storage controller identified by {controllerID}.

**Table 19 Storage controller attributes**

<b>Name</b>	Storage controller																										
<b>Type URI</b>	/rest/v1/Drawers/1/ComputeModules/1/Blades/{bladeID}/StorageControllers/{controllerID}																										
Attribute	Type	Required	Description																								
<code>Id</code>	String	Yes	Resource identifier																								
<code>Name</code>	String	Yes	Name of module																								
<code>Modified</code>	String	Yes	The date-time stamp that the object was last modified																								
<code>Interface</code>	String (enum)	Yes	Controller interface																								
<code>DriveCount</code>	Number	Yes	Number of connected drives																								
<code>Status</code>	Object	Yes	Resource status represented by following object: <table border="1"> <thead> <tr> <th>Name</th><th>Type</th><th>Required</th><th>Description</th></tr> </thead> <tbody> <tr> <td><code>State</code></td><td>String</td><td>Yes</td><td>Known state of the resource</td></tr> <tr> <td><code>Health</code></td><td>String</td><td>No</td><td>Overall health state from the view of this resource</td></tr> <tr> <td><code>HealthRollup</code></td><td>String</td><td>No</td><td>Health state of this resource in the absence of its dependent resources</td></tr> </tbody> </table>	Name	Type	Required	Description	<code>State</code>	String	Yes	Known state of the resource	<code>Health</code>	String	No	Overall health state from the view of this resource	<code>HealthRollup</code>	String	No	Health state of this resource in the absence of its dependent resources								
Name	Type	Required	Description																								
<code>State</code>	String	Yes	Known state of the resource																								
<code>Health</code>	String	No	Overall health state from the view of this resource																								
<code>HealthRollup</code>	String	No	Health state of this resource in the absence of its dependent resources																								
<code>Location</code>	Object	Yes	<table border="1"> <thead> <tr> <th>Name</th><th>Type</th><th>Required</th><th>Description</th></tr> </thead> <tbody> <tr> <td><code>Pod</code></td><td>Number</td><td>Yes</td><td>Pod number</td></tr> <tr> <td><code>Rack</code></td><td>Number</td><td>Yes</td><td>Rack number</td></tr> <tr> <td><code>Drawer</code></td><td>Number</td><td>Yes</td><td>Drawer number</td></tr> <tr> <td><code>Module</code></td><td>Number</td><td>Yes</td><td>Module number</td></tr> <tr> <td><code>Blade</code></td><td>Number</td><td>Yes</td><td>Blade number</td></tr> </tbody> </table>	Name	Type	Required	Description	<code>Pod</code>	Number	Yes	Pod number	<code>Rack</code>	Number	Yes	Rack number	<code>Drawer</code>	Number	Yes	Drawer number	<code>Module</code>	Number	Yes	Module number	<code>Blade</code>	Number	Yes	Blade number
Name	Type	Required	Description																								
<code>Pod</code>	Number	Yes	Pod number																								
<code>Rack</code>	Number	Yes	Rack number																								
<code>Drawer</code>	Number	Yes	Drawer number																								
<code>Module</code>	Number	Yes	Module number																								
<code>Blade</code>	Number	Yes	Blade number																								
<code>Oem</code>	Object	No	OEM defined object																								
<code>ContainedBy</code>	Link	Yes	Link to Blade containing this storage controller																								
<code>Drives</code>	Link	Yes	Link to drive collection connected to this controller																								

### 4.13.1 Metadata

TBD

### 4.13.2 JSON serialization

```
{  
    "@odata.context": string,  
    "@odata.id": string,  
    "@odata.type": string,  
    "Id": string,  
    "Name": string,  
    "Modified": string,  
    "Interface": enum ("PCIe", "SAS"),  
    "SATA")  
        "DriveCount": Number,

Operation is not allowed on this resource.

#### 4.13.3.5 DELETE

Operation is not allowed on this resource.

## 4.14 Drive collection

Drive collection resource – provides collection of all storage drives available in a storage controller.

**Table 20 Drive collection attributes**

Name	Drives		
Type URI	/rest/v1/Drawers/1/ComputeModules/1/Blades/{bladeID}/StorageControllers/{controllerID}/Drives		
Attribute	Type	Required	Description
Name	String	Yes	Name of collection
Modified	String	Yes	The date-time stamp that the object was last modified

### 4.14.1 Metadata

### 4.14.2 JSON serialization

```
{  
    "@odata.context": string,  
    "@odata.id": string,  
    "@odata.type": string,  
    "Name": string,  
    "Modified": string,  
    "Links": {  
        "Members@odata.count": Number,  
        "Members": [  
            {  
                "@odata.id": string  
            }  
        ]  
    }  
}
```

### 4.14.3 Operations

#### 4.14.3.1 GET

Request:

```
GET  
/rest/v1/Drawers/1/ComputeModules/1/Blades/{bladeID}/StorageControllers/{controllerID}/Drives  
Content-Type: application/json
```

Response:

```
{  
    "@odata.context": "/rest/v1/$metadata#Drives ",  
    "@odata.id":  
    "/rest/v1/Drawers/1/ComputeModules/1/Blades/1/StorageControllers/{controllerID}/Drives ",

        {
            "@odata.id": "/rest/v1/Managers/3"
        }
    ]
}
}

```

#### 4.16.3.2 PUT

Operation is not allowed on this resource.

#### 4.16.3.3 PATCH

Operation is not allowed on this resource.

#### 4.16.3.4 POST

Operation is not allowed on this resource.

#### 4.16.3.5 DELETE

Operation is not allowed on this resource.

### 4.17 Manager

Manager resource – provides detailed information about a manager identified by {managerID}.

**Table 23 Manager attributes**

<b>Name</b>	Manager																		
<b>Type URI</b>	/rest/v1/Managers/{managerID}																		
Attribute	Type	Required	Description																
Id	String	Yes	Resource identifier																
Name	String	Yes	Name of resource																
Modified	String	Yes	The date-time stamp that the object was last modified																
ManagerType	String (enum)	Yes	Type of manager																
Model	String, Null	No	Manager model																
Status	Object	Yes	Resource status represented by following object: <table border="1"> <thead> <tr> <th>Name</th><th>Type</th><th>Required</th><th>Description</th></tr> </thead> <tbody> <tr> <td>State</td><td>String</td><td>Yes</td><td>Known state of the resource</td></tr> <tr> <td>Health</td><td>String</td><td>No</td><td>Overall health state from the view of this resource</td></tr> <tr> <td>HealthRollup</td><td>String</td><td>No</td><td>Health state of this resource in the absence of its dependent</td></tr> </tbody> </table>	Name	Type	Required	Description	State	String	Yes	Known state of the resource	Health	String	No	Overall health state from the view of this resource	HealthRollup	String	No	Health state of this resource in the absence of its dependent
Name	Type	Required	Description																
State	String	Yes	Known state of the resource																
Health	String	No	Overall health state from the view of this resource																
HealthRollup	String	No	Health state of this resource in the absence of its dependent																

<b>Name</b>	Manager				
<b>Type URI</b>	/rest/v1/Managers/{managerID}				
<b>Attribute</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>		
			resources		
Firmware	Object	No	Resource status represented by following object:		
			<b>Name</b>	<b>Type</b>	
			Current	String	
				Yes	
			Current firmware version		
Oem	Object	No	OEM defined object		
GraphicalConsole	Object	Yes	<b>Name</b>	<b>Type</b>	
			Enabled	Boolean	
			MaxConcurrent Sessions	Number	
			ConnectTypes Supported	Enum	
SerialConsole	Object	Yes	<b>Name</b>	<b>Type</b>	
			Enabled	Boolean	
			MaxConcurrent Sessions	Number	
			ConnectTypes Supported	Enum	
CommandShell	Object	Yes	<b>Name</b>	<b>Type</b>	
			Enabled	Boolean	
			MaxConcurrent Sessions	Number	
			ConnectTypes Supported	Enum	
ManagerForChassis	Array	No	Array containing links to chassis (Pod, Drawer) managed by this manager		
ManagerForCompute Modules	Array	No	Array containing links to computer modules managed by this manager		
ManagerForFabric Modules	Array	No	Array containing links to fabric modules managed by this manager		
ManagerForBlades	Array	No	Array containing links to Blades managed by this manager		
ManagerForSwitches	Array	No	Array containing links to switches managed by this manager		
SimpleNetwork	Link	Yes	Link to collection of Ethernet interfaces		
NetworkService	Link	Yes	Link to Network Protocol object containing list of all protocols supported by this manager		

#### 4.17.1 Metadata

}

```

#### 4.17.3.2 PUT

Operation is not allowed on this resource.

#### 4.17.3.3 PATCH

Operation is not allowed on this resource.

#### 4.17.3.4 POST

Operation is not allowed on this resource.

#### 4.17.3.5 DELETE

Operation is not allowed on this resource.

### 4.18 Fabric module collection

Fabric module collection resource – provides collection of all fabric modules available in a drawer.

**Table 24 Fabric module collection attributes**

<b>Name</b>	Fabric module		
<b>Type URI</b>	/rest/v1/Drawers/1/FabricModules		
Attribute	Type	Required	Description
Name	String	Yes	Name of collection
Modified	String	Yes	The date-time stamp that the object was last modified

#### 4.18.1 Metadata

TBD.

#### 4.18.2 JSON serialization

```
{
    "@odata.context":      string,
    "@odata.id":           string,
    "@odata.type":          string,
    "Name":                 string,
    "Modified":              string,
}
```

```
    "Links": {
        "Members@odata.count": Number,
        "Members": [
            {
                "@odata.id": string
            }
        ]
    }
}
```

### 4.18.3 Operations

#### 4.18.3.1 GET

Request:

```
GET /rest/v1/Drawers/1/FabricModules
Content-Type: application/json
```

Response:

```
{
    "@odata.context": "/rest/v1/$metadata#RSAFabricModules",
    "@odata.id": "/rest/v1/Drawers/1/FabricModules",
    "@odata.type": "#RSAFabricModule.1.0.0.RSAFabricModuleCollection",

                "/rest/v1/Drawers/1/FabricModule/1/Switches/1"  
            }  
        ]  
    }  
}
```

### 4.20.3.2 PUT

Operation is not allowed on this resource.

### 4.20.3.3 PATCH

Operation is not allowed on this resource.

### 4.20.3.4 POST

Operation is not allowed on this resource.

### 4.20.3.5 DELETE

Operation is not allowed on this resource.

## 4.21 Switch

Switch resource – provides detailed information about a switch identified by {switchID}.

**Table 27 Switch attributes**

<b>Name</b>	Switch			
<b>Type URI</b>	/rest/v1/Drawers/1/FabricModules/{moduleID}/Switches/{switchID}			
<b>Attribute</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>	
<code>Id</code>	String	Yes	Resource identifier	
<code>Name</code>	String	Yes	Resource name	
<code>Modified</code>	String	Yes	The date-time stamp that the object was last modified	
<code>Status</code>	Object	Yes	Resource status represented by following object:	
			<b>Name</b>	<b>Type</b>
			<code>State</code>	String
			<code>Health</code>	String
			<code>HealthRollup</code>	String
			Known state of the resource	
			Overall health state from the view of this resource	
			Health state of this resource in the absence of its dependent resources	
<code>Location</code>	Object	Yes	<b>Name</b>	<b>Type</b>
			<code>Pod</code>	Number
			<code>Rack</code>	Number
			<code>Drawer</code>	Number
			<code>Module</code>	Number
			<code>Switch</code>	Number
<code>Oem</code>				
<code>SwitchPorts</code>				
<code>ContainedBy</code>				
<code>ManagedBy</code>				

### 4.21.1 Metadata

TBD.

### 4.21.2 JSON serialization

```

## 4.22 Switch port collection

Switch port collection resource – provides collection of all switch port available in a switch.

**Table 28 Switch ports collection attributes**

<b>Name</b>	Switch port collection		
<b>Type URI</b>	/rest/v1/Drawers/1/FabricModules/1/Switches/1/Ports		
<b>Attribute</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>
Name	String	Yes	Name of collection
Modified	String	Yes	The date-time stamp that the object was last modified

#### 4.22.1 Metadata

TBD.

#### 4.22.2 JSON serialization

```
{
    "@odata.context": string,
    "@odata.id": string,
    "@odata.type": string,
    "Name": string,
    "Modified": string,
    "Links": {
        "Members@odata.count": Number,
        "Members": [
            {
                "@odata.id": string
        }
    ]
}
```

```
        }
    ]
}
```

### 4.22.3 Operations

#### 4.22.3.1 GET

Request:

```
GET /rest/v1/Drawers/1/FabricModules/1/Switches/1/Ports
Content-Type: application/json
```

Response:

```
{
    "@odata.context": "/rest/v1/$metadata#RSASwitchPorts",
    "@odata.id": "/rest/v1/Drawers/1/FabricModules/1/Switches/1/Ports",
    "@odata.type": "#RSASwitchPort.1.0.0.RSASwitchPortsCollection",

        ]
    }
}
```

```

        ]
}
}
```

#### 4.22.3.2 PUT

Operation is not allowed on this resource.

#### 4.22.3.3 PATCH

Operation is not allowed on this resource.

#### 4.22.3.4 POST

Operation is not allowed on this resource.

#### 4.22.3.5 DELETE

Operation is not allowed on this resource.

### 4.23 Switch port

Switch port resource – provides detailed information about a switch port identified by {portID}.

**Table 29** Switch port attributes

<b>Name</b>	Switch port																		
<b>Type URI</b>	/rest/v1/Drawers/1/FabricModules/{moduleID}/Switches/{switchID}/Ports/{portID}																		
Attribute	Type	Required	Description																
Id	String	Yes	Resource identifier																
Name	String	Yes	Resource name																
Modified	String	Yes	The date-time stamp that the object was last modified																
LinkType	String (enum)	Yes	Type of port link																
OperationalState	String (enum)	Yes	Port link operational state																
AdministrativeState	String (enum)	Yes	Port link state forced by user.																
LinkSpeedGbps	Number	No	Port speed																
NeighborPort	String	No	TBD																
Status	Object	Yes	Resource status represented by following object: <table border="1"> <thead> <tr> <th>Name</th><th>Type</th><th>Required</th><th>Description</th></tr> </thead> <tbody> <tr> <td>State</td><td>String</td><td>Yes</td><td>Known state of the resource</td></tr> <tr> <td>Health</td><td>String</td><td>No</td><td>Overall health state from the view of this resource</td></tr> <tr> <td>HealthRollup</td><td>String</td><td>No</td><td>Health state of this resource in the absence of its dependent resources</td></tr> </tbody> </table>	Name	Type	Required	Description	State	String	Yes	Known state of the resource	Health	String	No	Overall health state from the view of this resource	HealthRollup	String	No	Health state of this resource in the absence of its dependent resources
Name	Type	Required	Description																
State	String	Yes	Known state of the resource																
Health	String	No	Overall health state from the view of this resource																
HealthRollup	String	No	Health state of this resource in the absence of its dependent resources																

<b>Name</b>	Switch port					
<b>Type URI</b>	/rest/v1/Drawers/1/FabricModules/{moduleID}/Switches/{switchID}/Ports/{portID}					
<b>Attribute</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>			
Location	Object	Yes	<b>Name</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>
			Pod	Number	Yes	Pod number
			Rack	Number	Yes	Rack number
			Drawer	Number	Yes	Drawer number
			Module	Number	Yes	Module number
Oem	Object	No	Switch number			
			OEM defined object			
			Link to Switch containing this switch port			
			Link to VLANs collection for this switch port			

#### 4.23.1 Metadata

TBD.

#### 4.23.2 JSON serialization

```
{  
    "@odata.context": string,  
    "@odata.id": string,  
    "@odata.type": string,

Operation is not allowed on this resource.

#### 4.24.3.5 DELETE

Operation is not allowed on this resource.

## 4.25 Network interface collection

Network interface collection resource – provides collection of all network interfaces supported by a manager identified by {managerID} or included in a blade identified by {bladeID}.

**Table 31 Network interface collection attributes**

<b>Name</b>	Network interfaces		
<b>Type URI</b>	/rest/v1/Drawers/{drawerID}/ComputeModules/{moduleID}/Blades/{bladeID}/EthernetInterfaces /rest/v1/Managers/{managerID}/EthernetInterfaces		
<b>Attribute</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>
Name	String	Yes	Name of collection
Modified	String	Yes	The date-time stamp that the object was last modified

### 4.25.1 Metadata

### 4.25.2 JSON serialization

```
{  
    "@odata.context": "string,  
    "@odata.id": "string,  
    "@odata.type": "string,  
    "Name": "string,  
    "Modified": "string,  
    "Links": {  
        "Members@odata.count": Number,  
        "Members": [  
            {  
                "@odata.id": "string  
            }  
        ]  
    }  
}
```

### 4.25.3 Operations

#### 4.25.3.1 GET

Request:

```
GET /rest/v1/Managers/{managerID}/EthernetInterfaces  
Content-Type: application/json
```

Response:

```
{  
    "@odata.context": "/rest/v1/$metadata#EthernetInterfaces",  
    "@odata.id": "/rest/v1/Managers/1/EthernetInterfaces",  
    "@odata.type": "#EthernetNetworkInterface.1.0.0.EthernetNetworkInterfaceCollection",

    "Links": {  
        "Members@odata.count": 1,  
        "Members": [  
            {  
                "@odata.id": "string  
            }  
        ]  
    }  
}
```

```

        "@odata.id":  

"/rest/v1/Managers/1/EthernetInterfaces/1"  

    }  

]  

}
}

```

#### 4.25.3.2 PUT

Operation is not allowed on this resource.

#### 4.25.3.3 PATCH

Operation is not allowed on this resource.

#### 4.25.3.4 POST

Operation is not allowed on this resource.

#### 4.25.3.5 DELETE

Operation is not allowed on this resource.

### 4.26 Network interface

Network Interface resource – provides detailed information about a network interface identified by {nicID} .

**Table 32 Network interface attributes**

<b>Name</b>		Network Interface			
<b>Type URI</b>		/rest/v1/Drawers/{drawerID}/ComputeModules/{moduleID}/Blades/{bladeID}/EthernetInterfaces/{nicID} /rest/v1/Managers/{managerID}/EthernetInterfaces/{nicID}			
<b>Attribute</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>		
Id	String	Yes	Resource identifier		
Name	String	Yes	Resource name		
Modified	String	Yes	The date-time stamp that the object was last modified		
Description	String	Yes	Resource description		
Status	Object	Yes	Resource status represented by following object:		
			<b>Name</b>	<b>Type</b>	<b>Required</b>
			State	String	Yes
			Health	String	No
			HealthRollup	String	No
			Overall health state from the view of this resource Health state of this resource in the absence of its dependent resources		
Oem	Object	No	OEM defined object		
FactoryMacAddress	String	No	This is the MAC address assigned to this NIC at the factory		
MacAddress	String	Yes	This is the currently assigned MAC address for this NIC		
LinkTechnology	String (enum), null	No	This is link technology, such as Ethernet, for this NIC.		
SpeedMbps	Number	No	This is the current speed in Mbps of this NIC.		
Autosense	Boolean	No	Indicates if the speed and duplex is automatically configured by the NIC		
FullDuplex	Boolean	No	Indicates if the NIC is in Full Duplex mode or not		
FrameSize	Number	No	MAC Frame size in bytes		
HostName	String	No	DNS Host Name, without any domain information		

<b>Name</b>		Network Interface				
<b>Type URI</b>		/rest/v1/Drawers/{drawerID}/ComputeModules/{moduleID}/Blades/{bladeID}/EthernetInterfaces/{nicID} /rest/v1/Managers/{managerID}/EthernetInterfaces/{nicID}				
<b>Attribute</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>			
FQDN	String	No	Fully qualified domain name obtained by DNS for this interface			
MaxIPv6StaticAddresses	Number	No	Indicates the maximum number of Static IPv6 addresses that can be configured on this interface			
VLANEnable	Boolean	Yes	Indicates if VLANs are enabled			
VLANId	Number	No	VLAN identifier for this NIC			
IPv4Addresses	Object	No	<b>Name</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>
			Address	String	Yes	IP address
			SubnetMask	String	Yes	IP subnet mask
			AddressOrigin	String	No	Indicates how address was determined
			Gateway	String	No	IPv4 gateway for this address
IPv6AddressPolicyTable	Object	No	<b>Name</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>
			Prefix	String	Yes	IPv6 Address Prefix for this table entry
			Precedence	Number	Yes	Precedence value for this table entry
			Label	Number	No	Label value for this table entry
IPv6StaticAddresses	Object	No	<b>Name</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>
			Address	String	Yes	IPv6 address
			PrefixLength	Number	No	IPv6 Address Prefix Length
			AddressOrigin	String	No	Indicates how the address was determined
			AddressState	String (enum), null	No	Current state of this address
IPv6Addresses	Object	No	<b>Name</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>
			Address	String	Yes	IPv6 address
			PrefixLength	Number	No	IPv6 Address Prefix Length
			AddressOrigin	String	No	Indicates how address was determined
			AddressState	String (enum), null	No	Current state of this address
IPv6DefaultGateway	String	No	default gateway address that is currently in use on this interface			
NameServers	String array	No	DNS name servers for this interface

#### 4.26.3.2 PUT

Operation is not allowed on this resource.

#### 4.26.3.3 PATCH

Operation is not allowed on this resource.

#### 4.26.3.4 POST

Operation is not allowed on this resource.

#### 4.26.3.5 DELETE

Operation is not allowed on this resource.

### 4.27 VLAN network interface collection

VLAN Network Interface collection resource – provides collection of all VLAN network interfaces existing on a switch port identified by {portID} or network interface identified by {nicID}.

**Table 33 VLAN network interface collection attributes**

Name	VLAN network interfaces		
Type URI	/rest/v1/Drawers/1/FabricModules/{moduleID}/Switches/{switchID}/Ports/{portID}/ VLANs /rest/v1/Drawers/{drawerID}/ComputeModules/{moduleID}/Blades/{bladeID}/EthernetInterfaces/{nicID}/VLANs		
Attribute	Type	Required	Description
Name	String	Yes	Name of collection
Modified	String	Yes	The date-time stamp that the object was last modified

#### 4.27.1 Metadata

TBD.

#### 4.27.2 JSON serialization

```
{
    "@odata.context": string,
    "@odata.id": string,
    "@odata.type": string,
    "Name": string,
    "Modified": string,
    "Links": {
        "Members@odata.count": Number,
        "Members": [
            {
                "@odata.id": string
            }
        ]
    }
}
```

### 4.27.3 Operations

#### 4.27.3.1 GET

Request:

```
GET /rest/v1/Drawers/1/FabricModules/1/Switches/1/Ports/1/VLANs
Content-Type: application/json
```

Response:

```
{
    "@odata.context": "/rest/v1/$metadata#RSAVLANS",
    "@odata.id":
"/rest/v1/Drawers/1/FabricModules/1/Switches/1/Ports/1/VLANs",

    ]
}
}
```

Response:

```
HTTP/1.1 201 Created
Location: /rest/v1/Drawers/1/FabricModules/1/Switches/1/Ports/1/VLANS/2
```

#### 4.27.3.5 DELETE

Operation is not allowed on this resource.

## 4.28 VLAN network interface

VLAN Network Interface resource – provides detailed information about a VLAN network interface identified by {vlanID}.

**Table 34 VLAN network interface attributes**

<b>Name</b>		VLAN Network Interface																	
<b>Type URI</b>		/rest/v1/Drawers/1/FabricModules/{moduleID}/Switches/{switchID}/Ports/{portID}/VLANS/{vlanID} /rest/v1/Drawers/{drawerID}/ComputeModules/{moduleID}/Blades/{bladeID}/EthernetInterfaces/{nicID}/VLANS/{vlanID}																	
<b>Attribute</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>																
Id	String	Yes	Resource identifier																
Name	String	Yes	Resource name																
Modified	String	Yes	The date-time stamp that the object was last modified																
Description	String	Yes	Resource description																
Status	Object	Yes	Resource status represented by following object: <table border="1"> <thead> <tr> <th>Name</th><th>Type</th><th>Required</th><th>Description</th></tr> </thead> <tbody> <tr> <td>State</td><td>String</td><td>Yes</td><td>Known state of the resource</td></tr> <tr> <td>Health</td><td>String</td><td>No</td><td>Overall health state from the view of this resource</td></tr> <tr> <td>HealthRollup</td><td>String</td><td>No</td><td>Health state of this resource in the absence of its dependent resources</td></tr> </tbody> </table>	Name	Type	Required	Description	State	String	Yes	Known state of the resource	Health	String	No	Overall health state from the view of this resource	HealthRollup	String	No	Health state of this resource in the absence of its dependent resources
Name	Type	Required	Description																
State	String	Yes	Known state of the resource																
Health	String	No	Overall health state from the view of this resource																
HealthRollup	String	No	Health state of this resource in the absence of its dependent resources																
Oem	Object	No	OEM defined object																
VLANEnable	Boolean	Yes	Indicates if this VLAN is enabled																
VLANId	Number	No	VLAN identifier for this NIC																

<b>Name</b>		VLAN Network Interface				
<b>Type URI</b>		/rest/v1/Drawers/1/FabricModules/{moduleID}/Switches/{switchID}/Ports/{portID}/VLANS/{vlanID} /rest/v1/Drawers/{drawerID}/ComputeModules/{moduleID}/Blades/{bladeID}/EthernetInterfaces/{nicID}/VLANS/{vlanID}				
<b>Attribute</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>			
IPv4Address	Object	No	<b>Name</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>
			Address	String	Yes	IP address
			SubnetMask	String	Yes	IP subnet mask
			AddressOrigin	String	No	indicates how the address was determined
			Gateway	String	No	IPv4 gateway for this address
			HostName	String	No	Host name
IPv6Address	Object	No	<b>Name</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>
			Address	String	Yes	IPv6 address
			PrefixLength	Number	No	IPv6 Address Prefix Length
			AddressOrigin	String	No	Indicates how the address was determined
			Scope	String	No	Scope of this address
			Gateway	String	No	IPv6 gateway for this address
			HostName	String	No	Host name
			FQDN	String	No	Fully Qualified Domain Name

#### 4.28.1 Metadata

TBD.

#### 4.28.2 JSON serialization

```
{

```

#### 4.28.3.2 PUT

Operation is not allowed on this resource.

#### 4.28.3.3 PATCH

Operation is not allowed on this resource.

#### 4.28.3.4 POST

Operation is not allowed on this resource.

#### 4.28.3.5 DELETE

Request:

```
DELETE /rest/v1/Drawers/1/FabricModules/1/Switches/1/Ports/1/VLANS/2
```

Response:

```
HTTP/1.1 204 No Content
```

§

## A Common Property Description

---

### *Status -> State*

- Enabled: This function or resource has been enabled
- Disabled: This function or resource has been disabled
- Offline: This function or resource is enabled, but currently unavailable
- InTest: This function or resource is under doing testing
- Starting: This function or resource is starting
- Absent: This function or resource is not installed

### *Status -> Health*

- OK: Normal
- Warning: A condition exists that requires attention
- Critical: A critical condition exists that requires immediate attention

### *RSABlade.Reset*

- On: Turn the system on
- ForceOff: Turn the system off immediately (nongraceful) shutdown
- GracefulRestart: Perform a graceful system shutdown followed by a restart of the system
- ForceRestart: Perform an immediate (non-graceful) shutdown, followed by a restart of the system
- Nmi: Generate a nonmaskable interrupt to cause an immediate system halt
- ForceOn: Turn the system on immediately
- PushPowerButton: Simulate the pressing of the physical power button on this system

### *BootSourceOverrideTarget/Supported*

- None: Boot from the normal boot device
- Pxe: Boot from the preboot execution (PXE) environment
- Floppy: Boot from the floppy disk drive
- Cd: Boot from the CD/DVD disc
- Usb: Boot from a USB device as specified by the system BIOS
- Hdd: Boot from a hard drive
- BiosSetup - Boot to the BIOS Setup Utility
- Utilities: Boot the manufacturer's Utilities programs
- Diags: Boot the manufacturer's Diagnostics program
- UefiShell: Boot to the UEFI Shell
- UefiTarget: Boot to the UEFI Device specified in the UefiTargetBootSourceOverride property

§
